EXPERIENCE

Microsoft

Seattle, WA / Vancouver, BC

Software Engineer II, Microsoft 365 Copilot (relocated to Seattle Oct. 2025)

Aug. 2025 – Present

- Led the cross-repository migration of the next-generation chat-response platform into the main Microsoft 365 Copilot application, delivering a production-ready server-side-rendered (SSR) chat architecture.
- Designed SSR-first rendering and server-rendered streaming patterns that reduced client-side overhead and established reusable foundations for future AI-powered experiences.
- Drove architecture for responsiveness and scalability, including chat orchestration evaluation and the transition to server-rendered chat streaming.
- Used web profiling, bundling tools and root-cause analysis to identify rendering, networking, and client-side performance bottlenecks; shipped improvements to CPU utilization, payload and bundle size, and chat responsiveness.

Software Engineer, Microsoft 365 Copilot & Whiteboard (Vancouver, BC)

Oct. 2023 – Aug. 2025

- Contributed to the early architecture of Microsoft's enterprise AI chat experience, defining how Copilot-generated content integrates with Microsoft 365 applications and workflows.
- Owned Copilot Chat orchestration areas including contextual grounding, conversation-history management, and operational tooling for LLM model observability.
- Designed and delivered in-chat AI-powered widget experiences that enrich responses with interactive cards for files, email, meetings, and other Microsoft 365 content.
- Led Responsible AI, privacy, security, compliance, and deployment-readiness work including technical onboarding, architecture reviews, data-flow analysis, and production-readiness processes for enterprise AI launches.
- Shipped usability and product improvements for Microsoft Whiteboard across canvas interaction, multi-selection, templates, and toolbar experiences.

Software Engineer Intern, Microsoft Whiteboard (Seattle, WA)

May 2022 – Aug. 2022

- Designed, developed and shipped a system for in-app feature announcements end-to-end, including accessible UI, ECS fighting, telemetry, testing, and production launch.

Project Manager & Software Engineer Intern, Microsoft Whiteboard (Seattle, WA)

May 2021 – Aug. 2021

- Designed, developed and shipped the Microsoft Teams Whiteboard Tab's functionality for retrieving and opening existing whiteboards, implementing board-loading workflows, shared-board permission validation, and automated testing.

EDUCATION

University of Toronto

Toronto, ON

Honours Bachelor of Science in Computer Science (cGPA: 3.9/4.0)

Sep. 2019 – Apr. 2023

Computer Science Specialist and Mathematics Minor

Member of U of T's Technology Leadership Initiative program

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Java, C, C++, SQL, Haskell, Racket, R.

Technologies: React, HTML/CSS, Tanstack, React Native, Express, MongoDB, FastAPI

AI & Platform: AI/LLM orchestration, response streaming, contextual grounding, observability, responsible AI, compliance and operational tooling.

Web development: Performance profiling, server-side rendering, bundle and payload optimization, rendering and network optimization, accessibility, privacy, security, and data-flow analysis.

ADDITIONAL EXPERIENCE

University of Toronto

Toronto, ON

Teaching Assistant

Jan. 2022 – Apr. 2023

- Courses: [CSC324: Principles of Programming Languages](#) and [CSC209: Software Tools and Systems Programming](#).
- Led tutorials, office hours, and assessment for courses spanning functional programming, language semantics, C, Unix/Linux, processes, memory management, debugging, and software tooling.

Wombo AI

Toronto, ON / Sao Paulo, Brazil

Strategic Advisor & Head of Operations, Brazil

Sep. 2020 – Apr. 2021

- Advised and planned Wombo AI's Brazil launch, which generated more than 90% of the startup's initial traffic and contributed to 50 million downloads in four months and #1 App Store placement in 20+ countries.

LEADERSHIP

UofT AI (University of Toronto Artificial Intelligence Group)

Toronto, ON

Director of Marketing

Aug. 2020 – May 2021

- Led a team of 15 students managing marketing operations and promotion for the UofT AI Conference, attended by 800+ participants and featuring speakers including Turing Award recipient Geoffrey Hinton.

External Relations Executive

Feb. 2020 – Aug. 2020

- Organized an international machine learning competition for 100+ students from the top 25 North American universities, with a \$100,000 budget and partnerships including Google AI, IBM, DeepMind, and Vector Institute.
- Created monthly artificial-intelligence newsletters for 1,300+ recipients.

Google Developer Student Club

Toronto, ON

Research Director

Aug. 2020 – Jul. 2021

- Researched technology news, tools, and learning resources and presented workshops for students from diverse computer-science backgrounds.
